GENERAL SITUATION

The Centers for Disease Control and Prevention issued new guidelines for those with underlying medical conditions when it comes to the COVID-19 vaccine. Officials say those with weakened immune systems and an increased risk of a severe case of coronavirus may receive the vaccine. However, the CDC says there is a chance that some could experience a reduced immune response to the vaccine. Those with underlying medical conditions should check they are not allergic to anything in the vaccine before getting it.

New COVID protocols for certain airline passengers:
Airline passengers arriving to the U.S. from Great Britain must show proof of a negative COVID test. The new CDC guideline also requires that test results must be known 72 hours or less before departure and comes amid concerns about the new coronavirus variant. Airlines must confirm negative test results for all passengers before they board a plane. If a passenger chooses not to take a test, the airline must deny boarding to that passenger.

New York Gov. Andrew Cuomo said he will be signing an executive order that would punish those who knowingly break the law with regards to fraud and the Covid-19 vaccine fine with up to a million dollars as well as revocation of licenses. The order will apply to doctors, nurses, pharmacists or any licensed health care professional.

Gov. Cuomo said that 140,000 New Yorkers have already received one vaccine, with 259,000 vaccines expected this week. He also added that at least 139,000 doses will be coming from Pfizer and 119,000 will come from Moderna.

Gov. Cuomo said that vaccine eligibility this week is expanding to cover urgent care center employees, those administering the vaccine and residents of OASAS facilities. Next week, the criteria will open up to ambulatory care healthcare workers and public-facing health workers - - including those who administer COVID tests.

New Jersey Gov. Phil Murphy said that the first nursing home resident and staff member received the COVID-19 vaccine this morning as 291 long-term care facilities state-wide are set to receive vaccines. The governor said that vaccinations are planned for more than 83,000 long-term care residents and staff by February. It's the start of a massive campaign to protect New Jersey's nursing homes and long-term care facilities.
